

GALAXY URBAN LOUVER

WALL MOUNT

Urban galaxy louvered roof system is a wall mounted flat louvered system that is supported by suspended hangers attached to side beams. There are not any supporting / carrier posts at the front end, giving the user an opportunity to have an undivided open area with a roof. Generally, preferred at the street sides of bars and restaurants, villa decks, private property entrances, all places where there is space limitations or access issues. Water drainage is also different only in this system than all others: guttered profiles on 3 sides and front profile is designed to discharge the rainwater with free fall principle. This system also have a different profile structure and dimensions than other systems. Insulation, light and sound system integrations are optional.

Additional Options

- Linear Led Light
