HERE IS YOUR GALAXY

The louvered roof system is designed and supported with many options to be used freely in all four seasons.

Louvered roof system can be easily integrated with sound and light systems. And with additional heating systems, it can be used even in difficult winter conditions. Motivated to innovation, our teams at Pergola Room LLC introduced the Galaxy Retractable Louver Pergola systems after a year of R&D studies in 2018.

As the new product group presented to your service and appreciation, Elegant in its own class Galaxy opens and closes the louvers to 80 degrees while retracting with "One-Button-Touch". Retractable feature makes our product strong in the industry and stylish in the market, adding value to your spaces and properties.

GALAXY SHINE LOUVER

WALL MOUNT

Shine is a Galaxy Louvered Roof System that is mounted to a structure on one side and standing on 2 support posts on the other side. Day lights and air volume circulating through the roof can be adjusted by rotating the louver panels on their own axis at the touch of a button. Each louver can be adjusted to any angle between 0 degree and 120 degrees. Shine model is ideal for large area closures. Generally preferred at pool sides, villa gardens, restaurants and bars. Thanks to option of attaching the lights to louver panels, three different light systems can be used at the same time.

Additional Options

- Linear Led Light
- Dimmer Unit
- Wind & Rain Sensor
- Non-Standard RAL Colors
- Selective Wood Coating
- Insulated Aerofoil Louver & Profiles
- Sliding GLASS DOORS
- Motorized GUILLOTINE GLASS
- Zip Screen

Rolling Louvered Roof

Ideal for: Hotels, bars, restaurants and leisure industry as well as private houses and properties.

GALAXY SHINE LOUVER

FREE STANDING

Shine, a model of Galaxy Louvered Roof Systems, is supported by fine finished 4 carrier posts, making the system a strong and free standing structure, not attached to any surface. This provides opportunity of closures of areas that are detached from any structure, such as outdoor kitchens, pool sides and more. Louver panels can rotate on their own axis from 0 degree up to 120 degrees, accessing the day lights and air circulation as needed. As other shine model, by attaching the lights to louver panels, 3 different light systems can be used at the same time.

Additional Options

Features:

- A stylish-looking lighting system can be obtained in various colours thanks to our lighting solution. Lighting system runs along all four sides of our product and is integrated into our gutter profiles. You can choose a single colour or RGB colour option.

EXPLORE

Over the years, the Retractable Pergola Awning Roof Sytem has been manufactured with different materials. And the systems are used as heavy structures or sometimes in the simplest form of living spaces. Pergola Systems, which we have achieved a new mechanical transformation by developing technology, has become a part in every field of our lives. As Pergola Room LLC, we continue to bring a new perspective to Retractable Roof Pergola systems with our 15 years of background experience, professional staff and advanced service policy based on customer satisfaction.

TECTONA FLAT PERGOLA

WALL MOUNT

In botanical science, leaf species that grow in a flat surface are called subulate. With this in mind, we have gathered our pergola systems that can be opened and closed on a flat surface.

Teak (/tik/) (Tectona grandis) is a tropical hardwood species placed in the family Lamiaceae. Tectona grandis is a large, deciduous tree that occurs in mixed hardwood forests. It has small, fragrant white flowers and papery leaves that are often hairy on the lower surface. It is sometimes known as the "Burmese Teak". Therefore Tectona is our most premium retractable pergola system provides a stylish architectural covering as per the name was given via precious botanic plant.Thanks to its profile structure and improved mechanical features, this model can provide shade covering for 1.452 sqft with single press of a button. Without any extra posts, projection up to 32'-10" can be manufactured. In addition, this model works well with glass covering or similiar kind of side coverings.

Additional Options

- Linear Led Light
- Dimmer Unit
- Wind & Rain Sensor
- Non-Standart RAL Colors
- Selective Wood Coating
- Insulated Aerofoil Louver & Profiles
- Sliding GLASS DOORS
- Motorized GUILLLOTINE GLASS
- Zip Screen

ARCHY-MADE

Necessity is the mother of all inventions and solutions. In time, small dreams turn into great inventions. We have been building shading systems since the first day we opened our doors for production. We have been working hard to find new solutions of pergola systems.

Here are our new ARCHY-MADE Series for your demands, which we prepared with the years of experience and long R&D studies. Our Archy Series; ARCHY-1 and ARCHY-6 models are available for large area closure projects. Other models are available for small and boutique projects. ARCHY-2 model is available in free designs.

DYNAFIX SUNROOM

Fully Glazed Inclined Roof System

Sunroom Systems are fully glazed by tempered and laminated glass roof with aluminum structure. Further more functional, ergonomic and advanced technological glass systems. Sunrooms are providing the opportunity to use outdoor space in any conditions during all seasons. Dynafix model roof is inclined stationary glass system. An aesthetically pleasing solution for roofs requiring different pitches. By integrating into your space a heat insulated system, there are two type of insulation; Hawaii40 and Hawaii80. You can enjoy the comfort of your home without being affected by ambient conditions.

DynaFix

DynaFix Sunroom Hawaii40 System

Half Insulated

HAWAII 40 is a versatile glass roof system without thermal barrier. It offers a inclined roof design. System can usable 200 days a year like living room.

A beautiful design with smoothly rounded profile corners. Drain pipes and other conduits hide behind clip-on facing profiles. Frameholders with clip-on beadsand gaskets avoid use of silicone. Filigrane fixed glazing without vertical frame profiles for maximum transparence and glass house impressionwhile giving shelter from the elements. This glass house optic is best served using all-glass sliding systems for the side openings. Ceiling tracks for sliding walls can be placedinside of the ring beam to enhance the slim line impression.

Roof pitch is possible between 5° and 45° by external structure. Height-adjustable supports are avai-lable for the roof posts. Using optional steel reinforcements for eaves and rafters allows for large unsupported roof spans. Spot lights can be attached to the rafters in a special clip-on profile.

DynaFix Sunroom Hawaii80 System

Fully Insulated

Lightweight roofing system made from aluminium profiles with thermal break and extensive insulation; internal support structure. System can usable 365 days a year like living room.

Three different rafter sizes and one glazing bar. Front beam incorporates rounded integral gutter. Corner posts with rounded outer detail. Casing from aluminium as clamp-on profile. Arris and corner posts available in angles between 0° and 90°. Rounded exterior profiles. Easy assembly forany roof pitch as ridge and eaves details remain constant. Elements with thickness between 1 31/32" and 3 35/64" are mounted against an outer stop rail and fitted on the inside with glass clip and gasket. No silicone is required for the installation. Different colours can be chosen for inside and outside. Insulating glass or panels from 35/32"thickness.

CUBO SUNROOM

Stationary, Invisible and Flat Roof with tempered laminated double glazed

CUBO flat-roof design impresses with its uncluttered cubical lines and will keep on doing so. Explore the world of contemporary design for your patio. There are two types of systems: HAWAII-40 (half insulated) and HAWAII-80 (fully insulated like your living room)

Cubo

WALL MOUNT - FREE STANDING

CUBO flat-roof design impresses with its uncluttered cubical lines and will keep on doing so. Explore the world of contemporary design for your patio. There are two type systems: HAWAII-40 (half insulated) and HAWAII-80 (fully insulated like your living room life)

The complete system, based on a slim thermally broken aluminium frame with a foam filled core (optional), captivates with its high quality finish and guarantees stability and longevity. You are presented with a wide range of options in the planning phase to ensure that you achieve your desired result. The great thermal insulation provides a sense of comfort and there are a wide variety of configurations which give you an impressive degree of freedom in the design. High quality fittings additionally ensure long term functionality.

You are able to increase your living space; gain instant enjoyment of the extra space in the summer and benefit from energy saving properties in the winter.

Ideal for: Pool closures, cafes & restaurants, terraces, gardens, backyards etc. All kinds of areas can be closed as you wish.

Key benefits

- Roofs can be built to any size
- Adapts perfectly to any spatial conditions, add-on or built-in options
- Optional integrated LED lighting
- Broad range of colours for the individual touch

Glazing Insulated glass and panels from 15/16" glass thickness available.

Security provided by the application of tempered exterior and laminated glass inside.

More comfort with Solar Low-e and reflective lenses.

PRIME SUNROOM INDIVIDUAL DESIGN

Fully customized sunroom on your space, we project it with your requirements. Meanwhile; we offer the ability to customize each sunroom to fit your distinct desires. No off-the-shelf stock sizes or panels, no mixing and matching miscellaneous parts. All sunroom additions are individually designed and engineered.

INDIVIDUAL TERRACE ROOF

When it comes to choosing a design featuring the new PRIME terrace roof, the sky's the limit. PRIME convinces with numerous roof variants, large support widths without middle post and additional special installation, safety and design features:

Prime

WALL MOUNT - FREE STANDING

Easy installation

Thanks to its sophisticated technical concept, PRIME can be easily and quickly installed:

- Eaves carrier without steel inserts.
- Specially developed connection of front support and post already stabilises the frame at the time of installation.
- Numerous pre-fitted parts ex works.

Guaranteed stability

The innovative joining solution guarantees stability even without glass:

- Specially designed joint between eaves carrier and post made of high-quality steel
- Lightweight construction, no steel in the eaves carriers
- Stability during installation

Flexible and individual design

The two available design variants can be equipped with additional options:

- Optional panel for integrated shading
- Covers, downpipes and downpipe covers according to visual preferences
- Terrace roofs with roof overhang

Flexible and individual design

Two types of plane rafters are available depending on the static and visual requirements:

- Plane rafter with external statics
- Plane rafter with internal statics
- The plane rafters are available in four different sizes
- The edge rafters are laterally plane and fitted with a flush side cover.
- All rafters are optionally available with steel insert and can therefore also be used with extraordinarily high surface loads or large roof depths.

Pool closures, cafes & restaurants, terraces, gardens, backyards etc. All kinds of areas can be closed as you wish.

“Treat your Galaxy like you want to treat.

Global warming is the long-term heating of the Earth's climate system, triggered by human activities, such as combustion of fossil fuels that raises the heat trapping greenhouse gases in the Earth's atmosphere, since 1850-1900 after the pre-industrial era.

global warming is not cool!
